

Avviene tramite stampa a pressione/calore, con l'utilizzo di piastre metalliche. Queste ultime hanno misure di circa 90x130cm, di conseguenza sia sulla mezza pelle che su quella intera, si noteranno dei segni dovuti alla sovrapposizione delle battute di stampa.

Molti dei disegni proposti sono studiati per andare a tagliare il fiore/rifinizione della pelle, al fine di rendere l'effetto più realistico.

Come constatabile da cartella, il risultato della stampa varia aseconda della qualità della pelle scelta. Se sceglierete di stampare su pelli rifinite all'anilina, il colore della pelle tenderà sempre a curire e a creare bicromia.
